K4357 POB CB

K4347 POB

K4347 POB CB

Stylish solid brass and an elegant rope-edge detail combine in an extensive range exclusively designed for traditional appeal.

All Grosvenor accessory plates are polished prior to being coated with a heat cured powder lacquer finish which retains their elegant, individual appearance and makes them very durable and tarnish resistant.

This design incorporates a double wound isolating transformer rated 20VA at 230 or 115 volts it meets BS.3535: 1996 making it safe for use in bathrooms. Insertion of a shaver plug automatically switches on by energising the primary side of the isolating transformer – removal automatically switches off.

The transformer is protected against overload by an automatic solid state overload device with automatic resetting.

60W min, 450W max for each dimmer

Conforming to the latest standards BS EN 60669-2-1 and BS EN 55015, they are overload protected and are suitable for use with tungsten filament lamps only.

Two way dimmers use push on/push off switches.

They are not suitable for use with fluorescent loads or with electronic or wire-wound transformers in low voltage lighting systems

K4302 POB LV 1 1
2 GANG TWO WAY DOUBLE
60W/VA min, 450W/360VA max for each dimmer

Conforming to the latest standards BS EN 60669-2-1 and BS EN 55015, they use 'state of the art' micro controller based circuitry to provide soft start and overload protection.

The soft start feature helps in greatly prolonging the life of tungsten, normal or halogen lamps.

Suitable for use with tungsten filament GLS lamps and low voltage halogen lamps via good quality dimmable electronic or wire-wound low voltage transformers.

Not suitable for use with fluorescent loads.

K1761 POB 1 1
2 GANG SINGLE
TWO WAY 90-650W

Conforming to relevant parts of BS 5518, these dimmers are suitable for use with tungsten filament lamps only.

NOTE: Dimmer switches specified to work at 50Hz are not really suitable for use at 60Hz and vice versa.

The one way dimmers use rotary on/off switches, while the two way dimmers use push on/push off switches.

These dimmer switches are not suitable for use with fluorescent loads, electronic or wire-wound transformers in low voltage lighting systems
