

## MK Pinnacle, a versatile, angular bench trunking system.

It is ideally suited for distributing LV electrical and communication services in laboratories, schools and workshops and other applications where the service outlets are required to be mounted on or above desks or benches.

### Bench units

One gang, two gang, two gang plus one gang and three gang bench units are available as single and two sided assemblies.

### Coupler sets for greater strength and protection

Wherever two units need to be joined, coupler sets maintain the extra protection of Pinnacle's Heavy Duty and IP4X classification

### Pre-fabricated corners

Pre-fabricated internal and external corners are available for maximum flexibility, system integrity and protection

Use Pinnacle with a wide selection of MK accessory ranges

## PERIMETER AND DISTRIBUTION

## COMPONENT SELECTOR CHART

## TRUNKING

Pinnacle trunking is available in a choice of colours, White (WHI) and Special (COL)

The special (COL) offers a choice of over 180 RAL paint colours. Specify your choice when ordering

Manufactured from PVC-U and supplied in 2 metre and 3 metre lengths, Pinnacle has been designed to provide a high level of protection meeting the heavy duty requirements of BS 4678 Part 4 and the IP4X classification of EN60529.

Pinnacle trunking is available in a single or double configuration.

Single trunking dimensions are 90mm x 105mm and offer the user a choice of two different finished heights and fascia angles.

Double trunking dimensions are 180mm x 105mm.

Both assemblies may be fitted either direct to the work surface or inverted and installed above the working area.

Cable segregation is provided by two separate compartments with the facility to further subdivide the main compartment by means of a clip in cable divider.

Single profiles may be converted to a back to back double assembly. A one piece centre lid and double end caps provide a mechanical and aesthetic coupling.
