

RAISED ACCESS FLOOR

Ideal for heavy traffic environments

The uniquely constructed Prestige Series 8 raised floor outlet box needs no adjustment or levelling and is supplied ready for installation. Easy to fit, effective and with concealed fixing toggles it requires only accessory plates to provide mounting for power, telecom or data outlets.

Two standard depths of boxes are available, in two, three and four compartment versions. Dividers allow for the segregation of accessory plates enabling services of different voltages to be contained within the same box. Self closing lids are a safety feature of Prestige Boxes and are recessed to accept carpet or other floor finishes. Cables are guided by retainers through generous cable outlets which can be locked into position.

Serviced Accessory Plates are provided with accessories (unassembled).

K85671 and **K85672** have two earth terminals to provide a double earth facility for use when installations are to comply with Regulation 607 of BS 7671, IEE Wiring Regulations (16th Edition)

Serviced Accessory Plates are provided with accessories (unassembled).

85634* When installing 68mm deep boxes it is recommended that side-wired sockets be used to allow greater wiring space.

K85622 has the provision for two independent earth terminals for installations where a high integrity or clean earth is required.

K81695 only fits a 78mm deep Floor Outlet Box.

Plates are provided with apertures to allow fitting of MK and other standard accessories. Blank Plates can be punched to allow fitting of other accessories.

81655 and **81660** It is recommended that an MK ACCENT slimline socket or similar 3/3.5mm thick face plate socket is used.

85631 Accepts 462 WHI & 467 WHI single gang master and secondary telephone sockets and 1488 WHI RJ11 telephone/data socket, and 1482 WHI and 1483 WHI panel mounted sockets.
