

COMMERCIAL FANS SMART 23/9 and 30/12 CONTROL

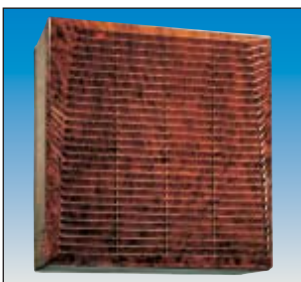

Available in 3 colours:

Grey

Black

Briar Wood

3 speed electronic controller +
reversibility + automatic/
manual function.

Through the various
sensors (air quality,
humidity, IR presence)
it is possible to drive and
control automatically
the Smart CONTROL
fans.

The use of a 12V Electronic Controller is of extreme importance because it allows the SMART 23/9 and 30/12 CONTROL series to be installed in any unsafe and electrically hazardous place like wet floors, water splashes, high level of humidity etc. In fact the System (according to the CEI 64.8 norm) gives a total electric security to the installation, dividing the 220/240V main line of the fan from the 12V of the electronic controller.

SMART CONTROL accessories

Description	Ref. 23/9	Ref. 30/12
